Azure Smart Space sensors

Premium conference camera with far-field mic array

Room utilization

Control buttons with dedicated Windows key

Windows collaboration displays by Avocor enable Microsoft 365 at room scale for enhanced teamwork, features a single-cable connection for seamless laptop pairing and advanced monitoring data to improve facilities and meeting ROI. The new collaboration displays are fully compatible with Windows 10 and offer a first-ever single-cable solution that solves the frustrating and often time-consuming problem of connecting devices and people in meetings. The new Windows collaboration displays by Avocor make it simple for teams to connect in a huddle space, across the conference table or even across the globe, allowing them to work together seamlessly and get more done.

Get meetings started, quickly

The single-cable solution that immediately and intelligently connects a Windows PC to the display, the display enables immediate control of the camera and mic for video and audio, as well as provides hard-wire ethernet connection and power to the laptop.

Enjoy ultimate collaboration

Connect and engage with colleagues regardless of location through the integrated, premium conference camera and stereo speakers. The active, far-field microphone array allows the display to connect with a variety of Unified Communications based software, delivering the ultimate audio experience.

Incredibly responsive with pixel-perfect touch

Windows collaboration displays designed and built by Avocor combine crisp 4K resolution with 20-point touch to offer exceptionally responsive and pixel-perfect touch.

Connect to the cloud

Built-in sensors that connect to Azure IoT Smart Spaces, so facility managers can utilize the environmental data such as room temperature, allowing for real-time adjustments as well as future room / investment planning.
